

The Service Prescription

More than just “feel good,” *The Service Prescription* offers hope and a solution for a healthcare system that is flailing and gasping for breath.

Six minutes. That’s what the average visit to the family doctor takes, (not counting the interminable wait in a waiting room more appropriate for prisoners than patients!) Patients are getting restless but they have nowhere to go!

One in five nurses plans to leave the profession within five years because of unsatisfactory working conditions. But Nurses don’t leave medicine...they leave management!

Doctors and Dentists are leaving, too! Managed healthcare was supposed to reduce patient demand and create a "doctor surplus," but the truth is just the opposite.

"...so relevant to a good medical, dental or pharmacy practice that if one did not know you, they would swear you were working in one of the professions as a practitioner."

-Bill Morgan R.Ph.

Good news! We have *The Service Prescription!*

Go ahead! Look inside:

- Come face to face with what brought you to healthcare in the first place.
- Find out how to build a team to administer the service prescription.
- Learn from a pro how to build a practice that will heal your heart.
- Get permission to have fun again.
- Take a good look at healthcare the way it was meant to be!
